- Multi-Sheet Bypass
- Collapsible Exit Tray
- Automatic Exposure
- Automatic Reset
- Automatic Shut-off
- Power Saving
- Quiet Operation
- Space-Saving Design
- Toner Recycling System
- Optional Desk with Paper Feed Unit

# KONICA 1212

The new Konica 1212 brings you all the best features of a dependable office assistant. It's hard-working, giving you reliable 12 cpm operating speed for A4-sized copies, with a 7.5 second first-copy output time. It's versatile, able to handle paper sizes as small as A5 or as large as A3, with a zoom function adjustable anywhere between 60 and 165% of the original size, in 1% increments.

It's also clean and efficient, with a toner recycling system and power conservation features such as Auto Shut-off and Power Saving to reflect its special concern for the environment. Even then, its user-friendly, whisper-quiet operation should make it very popular with its co-workers.

Check out the new 1212. Once you see the big performance that this little machine with the little voice has to offer, you'll want to make it your silent partner.

## RELIABLE COPY SPEED

The 1212 gives you efficient performance and efficient operation, including a steady operating speed of 12 A4-sized copies per minute with a first copy output time of only 7.5 seconds.

## MULTI-SHEET BYPASS

The retractable multi-sheet bypass makes copying onto your company letterhead, overhead projection sheets, coloured or other special paper fast and easy. You can also take advantage of its 50-sheet capacity (standard paper) and put it to good use as a backup paper supply.

## AUTOMATIC EXPOSURE

To ensure that your copies come out clear and bright, the 1212 employs Automatic Exposure, which automatically selects the perfect tone density for each original. For extra control, select from 6 levels of density.

## VERSATILE PAPER-SIZE CAPABILITY

For such a small performer, the 1212 can copy onto a wide variety of paper sizes. From A5 to A3, and anywhere in between, the 1212 can reliably handle jobs of any size.

## FRONT-LOADING PAPER SUPPLY

The 1212's front-loading paper supply gives you convenient access to up to 250 sheets of any size copy paper from A5 to A3. With the addition of the standard multi-sheet bypass and optional paper feed unit, total capacity is increased to 550 sheets.

## EASY ENLARGEMENT & REDUCTION

With the 1212's zoom magnification, adjustable from 60–165% in increments of 1%, you have complete control over the enlargement and reduction of your images. You may also choose from one of seven preset ratios for quick access to just the right size.

## POWER CONSERVATION FEATURES

The 1212 saves energy as well as space, with its Auto Shut-off and Power Saving features. If no copy jobs are needed for a pre-selected period of time (2, 5, or 10 minutes), the copier powers down automatically, or at the touch of the Power Saving Button.

## AUTOMATIC RESET CONVENIENCE

For the convenience of the next user, the 1212's Auto Reset function returns the copier to the default copy conditions after a pre-selected period of time.

## ENVIRONMENTALLY SOUND DESIGN

We at Konica are making every effort to ensure our copiers are as friendly to our planet as they are to users like you. The 1212's environmentally-friendly features include a toner recycling system, which returns unused toner to the developing unit for later copy jobs, saving resources and helping protect the environment. To help reduce air pollution, we've engineered the 1212 to emit a minimum of ozone, and its whisper-quiet operation reduces noise pollution as well.

## SPECIFICATIONS

## 1212
